Encl: (1) AT/FP OPLAN-01

1. Purpose. AT/FP OPLAN-01 sets forth policies, procedures, guidance, and responsibilities for Naval Training Center, Great Lakes and Tenant activities in the event of natural or manmade disaster and terrorist/criminal incidents.

2. Cancellation. This Operation Plan supersedes NTCGLAKESINST 5530.2D (Physical Security/Loss Prevention Plan) and is effective immediately.

3. Background.

a. Naval Training Center (NTC) is vulnerable to crisis situations created by flash flooding, hurricanes, thunderstorms, hazardous materials incidents, resource shortages, terrorist activities, general civil disturbances or other disasters. Recent world events have demonstrated a willingness of terrorists to use Weapons of Mass Destruction (WMD), which have the potential to produce

catastrophic loss of life and property destruction. It is prudent that the command maintains an effective plan and preparedness for dealing with a myriad of potential man-made or natural incidents.

b. The primary mission of the Command in any emergency is to protect the lives of personnel, and minimize damage or loss to military and personnel property. The AT/FP OPLAN has been developed to provide a sound basis for emergency preparedness programs and training activities. Furthermore, the Plan establishes the organizational and operational concepts and procedures necessary to minimize loss of life and property and expedite recovery operations.

c. The Plan is structured around three distinct operational phases pre-incident, incident, and post incident and generally follows the four phases of emergency management, mitigation, planning, response, and recovery. The pre-incident phase encompasses detail planning and those actions, which mitigate the deleterious affects natural or manmade incidents. The incident phase involves crisis management and consequence management. The post-incident phase focuses on recovery operations and capturing lessons learned.

d. In the preparation of the Plan, emergency responsibilities have been assigned, when possible, to activities having the same or similar responsibilities during normal operations. For many, this Plan represents a logical expansion of existing functional responsibilities.

e. The Plan has been prepared in consonance with cited Federal, State, and DOD mandates. A conscience effort has been made to limit restating existing regulations and orders; rather, the focus was to tailor higher headquarters orders to fit the local situation.

4. Scope. NTC Antiterrorism and Force Protection Plan, addresses physical security responsibilities as well as antiterrorism/force protection requirements IAW references (a) and (b). It is applicable to all civilian/military and departments of Great Lakes NTC Complex.

5. Responsibilities. Antiterrorism and Force Protection are the direct, immediate, legal and moral responsibility of all personnel assigned to this installation.

a. The NTC Antiterrorism Force Protection Officer (Director, Department of Public Safety) is the designated representative of CNTC, responsible for planning, implementing, enforcing and supervising the Command Antiterrorism and Force Protection Plan.

b. All department directors, tenant activity Commanding Officers and Officers in Charge are responsible for overseeing implementation of this instruction by checking for compliance throughout their areas of responsibilities, and ensuring that higher governing policies are enforced.

6. This plan contains information relative to the security posture of NTC Great Lakes, and will be classified "**FOR OFFICIAL USE ONLY**".
